

# OUTBREAK STATUS REPORT

Middlesex-London Health Unit

Last Updated: October 28, 2022 8:03 PM

For more information or to report an outbreak, contact:  
The Infectious Disease Control Team  
Middlesex-London Health Unit  
519-663-5317 ext. 2330

## Active

Premise	Type of Outbreak	Date Declared	Affected Area(s)	Date Resolved	Pathogen 1	Pathogen 2	Pathogen 3
Dearness Home	Respiratory	Oct 27, 2022	5 East		COVID-19		
LHSC- Victoria Hospital	Respiratory	Oct 26, 2022	B9 100 General Surgery		COVID-19		
Waverley Mansion	Respiratory	Oct 25, 2022	Lodge Side		COVID-19		
Extendicare	Respiratory	Oct 24, 2022	3rd Floor		Rhinovirus		
Earls Court Village	Respiratory	Oct 24, 2022	1st Floor (Brompton Wing)		COVID-19		
Richmond Woods	Respiratory	Oct 24, 2022	Facility-Wide		COVID-19		
Oneida Long Term Care Home	Respiratory	Oct 24, 2022	Facility-wide		COVID-19		
Village of Glendale Crossing	Respiratory	Oct 24, 2022	Byron, Pond Mills and Lambeth Units		COVID-19		
Kensington Village Retirement	Respiratory	Oct 24, 2022	5th Avenue		COVID-19		
Country Terrace	Respiratory	Oct 23, 2022	Facility Wide		COVID-19		
Chartwell Riverside Retirement Residence	Respiratory	Oct 23, 2022	Facility-wide		COVID-19		
LHSC- Victoria Hospital	Respiratory	Oct 22, 2022	C5-300 Thoracic Surgery		COVID-19		
LHSC- University Hospital	Respiratory	Oct 21, 2022	U7 Clinical Neurosciences		COVID-19		
Jake's House (formerly Prince George Retirement Residence)	Respiratory	Oct 19, 2022	Facility-wide		COVID-19		
Chelsey Park Retirement Community	Respiratory	Oct 18, 2022	5th Floor		COVID-19		
Meadow Park Care Centre	Respiratory	Oct 18, 2022	Yellow, Blue and Pink Units		COVID-19		
Windermere On The Mount	Respiratory	Oct 17, 2022	Facility Wide		COVID-19		
LHSC- Victoria Hospital	Respiratory	Oct 17, 2022	B9 200 Trauma Unit		COVID-19		
McCormick Home	Respiratory	Oct 15, 2022	Maple Grove 2nd Floor		COVID-19		
LHSC- University Hospital	Respiratory	Oct 14, 2022	U9 Orthopaedics		COVID-19		
Manor Village at London	Respiratory	Oct 12, 2022	3West, 3 Centre		COVID-19		
Middlesex Terrace	Respiratory	Oct 6, 2022	Facility-Wide		COVID-19		

## Active

Premise	Type of Outbreak	Date Declared	Affected Area(s)	Date Resolved	Pathogen 1	Pathogen 2	Pathogen 3
Amica & Company Retirement	Respiratory	Oct 3, 2022	7th Floor		COVID-19		
Kensington Village	Respiratory	Sep 30, 2022	1st Floor & 2nd Floor		COVID-19		

## Declared Over

Premise	Type of Outbreak	Date Declared	Affected Area(s)	Date Resolved	Pathogen 1	Pathogen 2	Pathogen 3
LHSC- University Hospital	Respiratory	Oct 14, 2022	U4 Medicine	Oct 26, 2022	COVID-19		
LHSC- Victoria Hospital	Respiratory	Sep 27, 2022	B7 200 Adult Mental Health and PICU	Oct 26, 2022	COVID-19		
Chartwell Royalcliffe Retirement Residence	Respiratory	Oct 5, 2022	Facility-wide	Oct 25, 2022	COVID-19		
Fox Hollow Retirement Residence	Respiratory	Oct 3, 2022	1st (AL), 3rd (IL) and 4th (IL) units, 2nd floor	Oct 24, 2022	COVID-19		

This information is to be used as a guide and is intended to help you prevent infections and outbreaks in your facility. The decision regarding who can work at a facility rests with that facility, but should take into account the need for adequate staffing levels and the risk of infection from staff working at multiple facilities. For more information please visit <https://www.healthunit.com/outbreak-resources>

### Enteric Outbreaks

- Staff members/volunteers from facilities in outbreak should not work at your facility until at least 48 hours have elapsed since they last worked at the affected facility. This period can be modified if the causative agent is known.
- Staff members/volunteers who are experiencing gastrointestinal illness should not work at any facility until they have been symptom-free for at least 48 hours. Good hand hygiene should be reinforced with returning staff members/volunteers.
- Staff should change to a clean uniform between facilities and before leaving the affected facility.

**(Source: Control of Gastroenteritis Outbreaks in Long-Term Care Homes: A Guide for Long-Term Care Homes and Public Health Unit Staff, 2013).** <https://www.healthunit.com/outbreak-resources>

### *Clostridium difficile* Outbreaks

- Provided that all required infection control practices are in place, staff can work at both affected and unaffected facilities without restrictions.

Residents/patients with suspected or confirmed *Clostridium difficile*-associated diarrhea (CDAD) can be transferred within the health care system; however, the receiving facility must be notified and be able to comply with the recommended infection control precautions. *Clostridium difficile* is suspected in a resident/patient who develops diarrhea and has been in a facility experiencing a *Clostridium difficile* outbreak. Initiate Isolation rapidly and stool samples should be collected. **(Source: Annex C: Testing, Surveillance and Management of Clostridium difficile In All Health Care Settings, January 2013).**

### Respiratory Outbreaks (non-influenza)

- Staff members/volunteers from facilities in outbreak should not work at your facility until at least 72 hours have elapsed since they last worked at the affected facility. For outbreaks attributable to Respiratory Syncytial Virus (RSV), Parainfluenza virus, Human metapneumovirus, and Adenovirus consider lengthening this time period to 5 days. Staff members/volunteers who are experiencing respiratory symptoms should not work at any facility until 5 days from onset of symptoms or until symptoms have resolved. For outbreaks attributable to RSV, lengthen this time period to 8 days. Good hand hygiene should be reinforced with returning staff members/volunteers. **(Source: A Guide to the Control of Respiratory Infection Outbreak in Long-Term Care Homes, Ministry of Health and Long-Term Care, November, 2015).** [http://www.health.gov.on.ca/en/pro/programs/publichealth/flu/docs/resp\\_infectn\\_ctrl\\_guide\\_ltc\\_2015\\_en.pdf](http://www.health.gov.on.ca/en/pro/programs/publichealth/flu/docs/resp_infectn_ctrl_guide_ltc_2015_en.pdf)

### Influenza Outbreaks

- The Health Unit recommends that you ask non-immunized staff/volunteers who are from facilities in outbreak, and who are not on an appropriate antiviral drug, to refrain from working at your facility until it has been at least 72 hours since they last worked at the affected facility.
- Staff members/volunteers who are experiencing respiratory/ influenza symptoms should not work at any facility until 5 days from onset of symptoms or until symptoms have resolved, whichever time period is shorter. Good hand hygiene should be reinforced with returning staff members/volunteers. **(Source: A Guide to the Control of Respiratory Infection Outbreak in Long-Term Care Homes, Ministry of Health and Long-Term Care, November, 2015).** [http://www.health.gov.on.ca/en/pro/programs/publichealth/flu/docs/resp\\_infectn\\_ctrl\\_guide\\_ltc\\_2015\\_en.pdf](http://www.health.gov.on.ca/en/pro/programs/publichealth/flu/docs/resp_infectn_ctrl_guide_ltc_2015_en.pdf)
