Middlesex-London Respiratory Surveillance Report

The data in this dashboard represent a snapshot in time and are subject to change as public health investigations into reported cases continue, and as ongoing data quality updates are undertaken, such as correcting for missing or overcounted cases and deaths. The number of cases reported on any given day may change as cases may be referred between jurisdictions or, following further investigation, individuals may no longer meet the case definition. The data shown here may differ from other sources as data may be extracted at different times. The dashboard will be updated every Tuesday at 12:00 PM, unless otherwise noted.

Respiratory summary	COVID-19 cases	Influenza cases	Other respiratory viruses
Wastewater surveillance	Institutional outbreaks	COVID-19 vaccination	Technical notes

Respiratory Transmission Risk Assessment

Middlesex-London region is in a High Risk Period for Respiratory Illness

Indicator	Status
1. Respiratory virus outbreaks in health care facilities	Frequent and ongoing
2. COVID-19 hospitalizations and ICU admissions	Stable
3. % positivity for COVID-19, influenza, or RSV	High
4. Wastewater surveillance trends of COVID-19 or influenza	High

COVID-19	Summary
----------	----------------

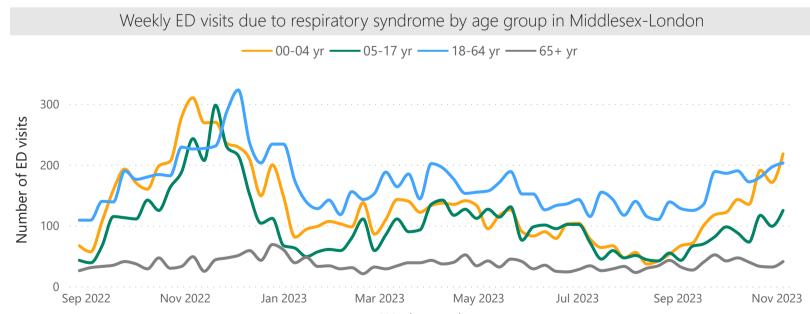

<u>Local</u> metrics	Week 45 (Nov 05 - Nov 11, 2023)	Season to date (Aug 27 - Nov 11, 2023)	Trend (compared to previous week)	
Laboratory-confirmed cases	132	1,209	Increased	
Deaths	1	20	Decreased	
Active outbreaks	As of the end of Nov 13, 2023:	14	Increased	
Local test positivity	Percent of tests positive: 23.0% Positivity level: High		Decreased	
<u>Provincial</u> metrics	(1	Week 44 Oct 29 - Nov 04, 2023)		
Provincial weekly				

Provincial weekly

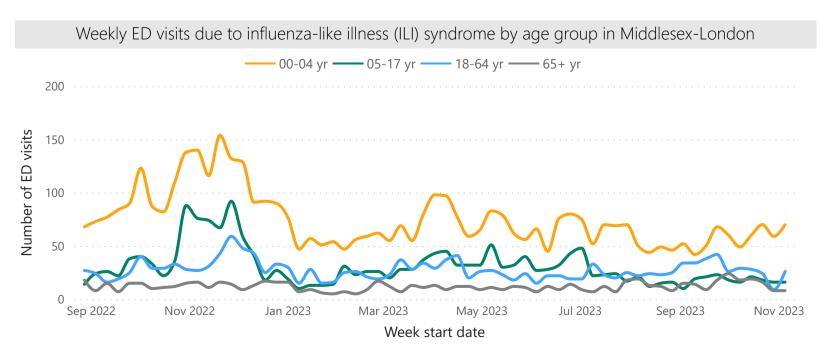

Influenza Summary				
<u>Local</u> metrics	Week 45 (Nov 05 - Nov 11, 2023)	Season to date (Aug 27 - Nov 11, 2023)	Trend (compared to previous week)	
Laboratory-confirmed cases	4	9	Increased	
Influenza sub-types	Influenza A: 4 Influenza B: 0	Influenza A: 9 Influenza B: 0	Increased Same	
Deaths	0	0	Same	
Active outbreaks	As of the end of Nov 13, 2023:	0	Same	
Provincial metrics	Week 44 (Oct 29 - Nov 04, 2023)			
Local influenza activity level	Activity level: Sporadic			
Provincial test positivity	Percent of tests positive: 0.6% Positivity level: Low			
Provincial weekly indicator change			Higher	

Clinical Syndromic Surveillance

Data are from the Acute Care Enhanced Surveillance (ACES). ACES provides near real-time surveillance of emergency department (ED) visit records for approximately 95% of acute care hospitals in Ontario. Classifying algorithms are used to categorize each ED visit record into clinical syndromes according to information about the main reason for the visit listed in the record. Respiratory-related syndrome and influenza-like illness visits to Middlesex-London region hospitals (regardless of the client's health unit of residence) are shown below. For more details about each syndrome, please refer to the Technical Notes.

Week start date

Provincial and national reports:

The latest Ontario Respiratory Virus Tool, issued by PHO, is available at: Ontario Respiratory Virus Tool. The latest Flu Watch report, issued by the Public Health Agency of Canada (PHAC), is available at: Weekly influenza reports. Emergency department visits due to respiratory syndrome, is available at: Viral Respiratory Mapper.
